

Automatic 3 side Sachet Packaging

Machine Model : SPM 202M

Complete Solution for various products at one Sachet

Max. 100~110 sachets/min by 2 working lanes x 50~55 cycles/min.

Automatic 3 side Sachet Packaging

Machine Model : SPM 202M

Project Overview

Maximum Optimum Output agreed to 100 Sachets/min.

5 different products are packaged at one sachet.

Minimize film waste.

Easy set up and operation.

1. The major difficulty;

5 different products filling at the same time at quite high speed for sachet filling.

Stable control of the film during operation to maintain good design shape.

2. Solution and Design;

Developing individual filling system.

Servo motor control system to increase speed.

Upgrade the film unwind station.

Upgrade the pre-heating & sealing station to ensure the seal integrity.

The innovative film release & sealing technology eliminates film waste.

Compact format, reduces change over time.

3. Final Operational Results;

Actual speed : Reaching 100 ~ 110 sachets/min (50~55 cycles x 2 lanes)

Operating by 1 operator only and Increase the labor efficiencies equivalent upto 3 staffs.

Basic Machine's General Specification

- ▶ Application : Tablet, Hard Capsule, Soft Gelatin Capsule
- ▶ Capacities : 30-60 cycles x Lanes / min. variable upon actual product conditions
- ▶ Operational Packing lines : 2 lanes
- ▶ Sachet Size : W 50 - 70mm, L 50 - 80mm,
- ▶ Electric Power : 6.5Kw 220V/380V, 50/60Hz,
- ▶ Dimension : 1,900(W) x 2,450(L) x 2,550(H)
