

iQ-FLiP

High Speed Low Cost Scale

More Speed for Less

*Interface with
vertical bagger
or container indexing
conveyor*

- ◆ More Speed:
Up to 80 fills
per minute
- ◆ Low Cost
Compared to existing
multiple lane scales
or combination scales
- ◆ More Production with
Less Maintenance
 - Only 1 weigh hopper
 - Quick Changeover
 - Minimal contact
surfaces to clean
- ◆ Less Space
fits in a 4' cube

Available in 3 Models:

1 oz. to 2 lbs.

2 lbs. to 5 lbs.

5 lbs. to 30 lbs.

iQ-FLiP

Fully Automate with Bagger
or Conveyor

HOW IT WORKS:

The iQ-FLiP vibrates a continuous stream of product into a two-compartment high speed oscillating weigh bucket that quickly flips from one compartment to the next once the target weight has been met in the first.

iQ-FLiP with Indexing Conveyor:

The iQ-FLiP is ideal to fill nutmeats, small whole vegetables, coffee, seeds, granules, pellets, and small candies, into cans, jars, trays or tubs.

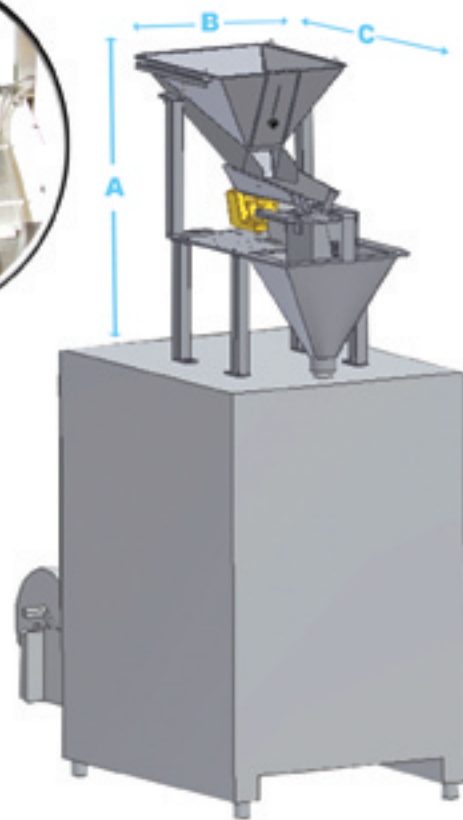

The iQ-Flip is available in three models: 1 oz. - 2 lbs., 2 lbs. - 5 lbs. and 5 lbs. - 30 lbs.

iQ-FLiP with Bagger:

The iQ-FLiP can be supported on a split support frame over the transition funnel of your bagger or mounted to the top plate on most vertical baggers. The short stack-up height is minimal compared to multiple lane linear scales and combination scales yet offering high speed filling.

WEIGHTS AND RATES*

1 - 4 oz.	70-80 fills per minute
4 - 16 oz.	60 fills per minute
1 - 2 lbs.	40 fills per minute
2.5 - 3 lbs.	30 fills per minute
3.5 - 5 lbs.	20 fills per minute (may require double dump)

*Above rates are estimated and final guarantees subject to product samples and testing. Accuracy is subject to product piece size, density and consistent head pressure.
